ORACLE NETSUITE

WMS GO – MOBILE WAREHOUSE

As distilleries reach significant production scale, operational complexity increases dramatically – multiple production processes, expanding warehouses, growing maturation inventories and international distribution all require a platform capable of managing every operational detail with precision. **Bottle ERP Enterprise Edition** is built for distilleries operating at industrial scale. Built on **Oracle NetSuite** and enhanced with advanced distillery functionality from Catalyst ERP, it gives large distillery businesses the visibility, control and automation required to operate efficiently at scale.

01 DESIGNED FOR

Built for organisations managing complex distillery operations across multiple teams and facilities – where industrial-scale production must run alongside full compliance and traceability.

🏠 Large independent distilleries

🏠 Multi-site production environments

📦 Significant maturation inventories

🔄 Thousands of SKUs and vessels

➔ Domestic & export distribution

📅 Advanced operational planning

02 A SINGLE PLATFORM

Enterprise Edition unifies the operational layers of a distillery into one connected platform. Production teams, warehouse operators, finance teams and leadership all work from the same real-time data.

WHAT THIS ENABLES

- ◆ Accurate stock visibility across facilities
- ◆ Precise compliance tracking
- ◆ Improved operational planning
- ◆ Enhanced financial insight
- ◆ Stronger operational governance

The result is a more controlled and efficient distillery operation – from grain to glass, every stage connected within one powerful platform that scales as the business grows.

CAPABILITIES ONE PLATFORM FOR COMPLEX OPERATIONS

INDUSTRIAL PRODUCTION

Advanced manufacturing for large-scale distilleries, coordinated by a visual planner across teams and facilities.

- Single & multi-stage spirit production
- Bottling operations
- Regauge workflows
- Sampling & laboratory testing
- Vatting & liquid transfers between vessels
- Visual production planning

WAREHOUSE – WMS GO

Full warehouse mobility. Floor teams record activity in real time on mobile devices for accurate visibility.

- Goods receipt & intake management
- Order shipment workflows
- Real-time stock updates
- Mobile regauge, sampling & vatting
- Vessel location & movement tracking
- Fault reporting - item & vessel lookup

COMPLIANCE & EXCISE

Comprehensive LPA tracking and regulatory compliance across domestic and export operations.

- LPA in / out & in-transit tracking
- LPA gain & loss monitoring
- Estimated & actual duty calculations
- W5 & W5D reporting
- Lot margin reporting
- EMCS for international movements

INVENTORY & CASK

Advanced control over extremely large inventories and maturation programmes.

- Multi-location & bin-level inventory
- Custom vessel numbering
- Wood & cask tracking
- Customer-owned cask management
- Location capacity management
- Fixed asset & sample stock management

COMMERCIAL & SALES

Supports complex commercial models across bottles, casks and bulk liquids.

- Finished bottle & cask sales
- Empty, filled & pre-filled cask programmes
- Customer-owned casks
- Proforma invoicing & SO approvals
- CRM opportunity management
- Integrated credit control

FINANCIAL AUTOMATION

Powerful financial capabilities giving finance teams accurate visibility across inventory and commercial activity.

- Private cask revenue recognition
- Automated third-party & customer storage
- Broker management workflows
- Predicted angel share & valuation modelling
- Landed cost & A&P cost tracking
- Intercompany transaction management

INTEGRATION & CUSTOMISATION

- POS & web sales imports
- Production - sampling - regauge imports
- Bulk receipt imports
- Custom PDF documents
- Multi-currency & flexible pricing
