500

CUSTOMER ACCOUNTS

As a distillery grows, so does the complexity – more production processes, a busier warehouse, larger maturing inventories and a widening customer base. **Bottle ERP Mid Market Edition** is built for established distilleries that have outgrown the basics and need a complete, connected platform. Built on **Oracle NetSuite** and enhanced with distillery functionality from Catalyst ERP, it adds mobile warehouse management, multi-stage production, advanced finance and data import – giving growing producers the visibility, control and automation to run efficiently at scale.

01 DESIGNED FOR

Built for established distilleries scaling up – where a busy warehouse, multi-stage production and a growing customer base all need to run from one connected platform.

Established & scaling distilleries

Busy single or multi-site warehouses

Significant maturation inventories

Tens of thousands of vessels

Domestic & export distribution

Advanced operational planning

02 A SINGLE PLATFORM

Mid Market Edition unifies the operational layers of a distillery into one connected platform. Production teams, warehouse operators, finance teams and leadership all work from the same real-time data.

WHAT THIS ENABLES

- ◆ Accurate stock visibility across facilities
- ◆ Precise compliance tracking
- ◆ Improved operational planning
- ◆ Enhanced financial insight
- ◆ Stronger operational governance

The result is a more controlled and efficient distillery operation – from grain to glass, every stage connected within one platform that has the room to grow as you do.

CAPABILITIES **THE COMPLETE DISTILLERY TOOLKIT**

PRODUCTION

Full manufacturing capability with a visual planner to coordinate production across the distillery.

- Single & multi-stage spirit production
- Bottling operations
- Regauge workflows
- Sampling
- Vatting & liquid transfers between vessels
- Visual production planning

WAREHOUSE – WMS GO

Full warehouse mobility. Floor teams record activity in real time on mobile devices for accurate visibility.

- Goods receipt & intake management
- Order shipment workflows
- Real-time stock updates
- Mobile regauge, sampling & vatting
- Vessel location & movement tracking
- Fault reporting - item & vessel lookup

COMPLIANCE & EXCISE

Comprehensive LPA tracking and regulatory compliance across domestic and export operations.

- LPA in / out & in-transit tracking
- LPA gain & loss monitoring
- Estimated & actual duty calculations
- W5 & W5D reporting
- Lot margin reporting
- Lot & finished-goods tracking

INVENTORY & CASK

Detailed control over growing inventories and maturation programmes across multiple locations.

- Multi-location & bin-level inventory
- Wood & cask tracking
- Customer-owned cask management
- Fixed asset management
- Sample stock management
- Multi-level bills of material

COMMERCIAL & SALES

Manage commercial activity across bottles, casks and bulk liquid with full sales controls.

- Finished bottle sales
- Empty, filled & pre-filled cask sales
- Proforma invoicing
- Sales order approval workflows
- CRM opportunity management
- Integrated credit control

FINANCE & INSIGHT

Finance capabilities that give teams accurate visibility across maturing stock and commercial activity.

- Private cask sale revenue recognition
- Predicted angel share & value
- Broker management workflows
- A&P cost tracking
- Lot margin reporting
- Multi-currency support

INTEGRATION & CUSTOMISATION

- Till & web sales imports
- Production - sampling - regauge imports
- Liquid transfer & bulk receipt imports
- Re-order points & back-to-back WOs
- Barcode auto-numbering

PLATFORM CAPACITY – SIZED FOR A GROWING DISTILLERY BUSINESS

150 CHART OF ACCOUNTS	100 DEPARTMENTS	100 CLASSES	50 EMPLOYEES	250 ITEMS	150 BILLS OF MATERIAL
500 CUSTOMERS	500 VENDORS	15,000 WAREHOUSE AREAS	2,000 OPENING STOCK	30,000 VESSELS TRACKED	250 GENERAL ASSETS

THE COMPLETE PLATFORM FOR GROWING DISTILLERIES

**BUILT TO GROW.
READY TO SCALE.**

Bottle ERP Mid Market Edition gives established distilleries the complete toolkit – mobile warehousing, multi-stage production, advanced finance and data import – and upgrades cleanly to Enterprise as you keep growing.
